# WHAT IS TRADING

---

Trading refers to the buying and selling of financial instruments, such as stocks, bonds, currencies, for commodities, in various markets.

Trader in to profit from short-term price fluctuations, relying on market analysis, technical indicators, and economic trends. It occurs on various platforms, including stock exchanges and electronic trading platforms.

Trading can be done by individuals investors, institutional investors, or through automated systems. successful trading requires understanding market dynamics, risk management, and staying informed about global economic factors influencing asset prices.

Verification of stake APR at 2%, helps remunerate holders, while likewise adding extra security to the system while the clients stake.

## WHAT IS CRYPTO CURRENCY ?

In 2009, the founder of bitcoin, Satoshi Nakamoto, launched an idea that would be changed altogether how people think about money. What if the currency were regulated by mathematics rather than by any governments? Cryptocurrencies (Bitcoin etc..) are a digital form of money that runs on a totally new monetary system, one that is not regulated by any centralized authority or tracked by some regular institution. Each digital currency is supported by a decentralized peer-to-peer network called the blockchain.

Blockchain technology ensures that all cryptocurrencies are kept track of, regardless if they are being held in a digital wallet or being used in trading.

# WHAT IS STOCK TRADING?

A stock market, equity market, or share market is the aggregation of buyers and sellers of stocks (also called shares), which represent ownership claims on businesses; these may include securities listed on a public stock exchange as well as stock that is only traded privately, such as shares of private companies that are sold to investors through equity crowdfunding platforms. Investments are usually made with an investment strategy in mind.
